INTRODUCTION

JIACCO was incorporated as private limited company in 1977, offering Non-destructive testing (NDT) services right from conceptual planning to completion of projects including preparation of testing procedures, complete range of inspection services on job site, supervision of pressure testing etc. etc. High tech, best quality and satisfactory service has been our motto throughout.

JIACCO like any other dynamic company has been keeping pace with the advancements in science and technology and has been able to diversify its field of activities to meet the changing demands of the projects to implement international codes and specifications. We have ensured to develop and enhance the confidence of end-users through continuous improvement in management systems and adhering to our quality objectives by providing services of inspection, testing and certification of their product and maintaining the professional integrity.

JIACCO is now 35 years old and in the enviable position of possessing a very strong technical base for the services, certainly one of the most established companies in Pakistan backed by an excellent qualified, rich experienced and expanding team of engineers, supervisors equipped with the conventional and highly sophisticated NDT equipment, tools, machines, accessories etc.

JIACCO has the privilege of being the first and the only company to complete independently non-destructive testing and heat treatment of a number of huge projects. JIACCO has replaced the foreign inspection companies on many of the projects like Fertilizers, Oil & Gas Installations, Hydel, Thermal and Barrages, Polyester and Chemical Plants, Cross Country Pipelines etc. etc.

Our collaboration with foreign companies from round the globe shows the quality standard we have achieved and maintained. It also proves the trust and satisfaction our foreign collaborators have on us.

Our safety standards are regarded as to be the best and in line with the international practices. JIACCO is not only a quality conscious company but also a safety conscious one. It is because of the fact that safety is given high priority, we have nil causality factor for the last many years. The various safety awards presented to JIACCO by well-known organizations like Pakistan PTA Ltd., Marubeni at PARCO etc. proves that they have acknowledged this standard of safety.

Professionals at JIACCO consider excellence as to have no ends hence are constantly struggling to provide services of even better quality round the clock.
